Office Storage Solutions

Vertical Carousels - L2E Integrated Filing & Storage Solutions

With tens of thousands of installations worldwide, our Vertical Carousels are full-featured, extremely reliable and cost-effective. They are highly configurable to accommodate your exact requirements.

L2Es are ideally suited for managing records/ documents/media and as storage management systems for small parts.

The benefits of using the L2E are immediately apparent:

Media comes to the user - *time saving, ergonomic and safe*

Control and software can help track users and transactions - *management*

Access restrictions can be applied - *security, safety, compliance*

However, the most important advantage is return on investment.

Look under the surface of your filing operations and calculate the true cost of filing. The cost of the equipment is only around 2%, then floor space 5%, supplies 10%, personnel 67% and supervisors 16% make up the rest of the cost.

Sizes

The L2E is available in a range of dimensions, allowing you to maximize your storage volume. The units will be designed to fit the available floor to ceiling height. Please contact us to discuss exact specifications.

Shelving Options

We offer the largest choice of shelving options, from various filing configurations to lab samples and police evidence.

Seamless Controls and Connectivity

State-of-the-art and intuitive control system allows at-station control via a panel or remote control via standard communication ports.

Management Software

Incorporating more than 50 years of records management experience, KaRMA manages the complete life-cycle of your documents and records. With features and tools for user- & departmental-level security, request management, label printing, and reporting, KaRMA can manage all your records and documents whether you are a small GPs' office or an International Corporation.
