The Smart Locker System

IN PARTNERSHIP WITH

Office **S**torage **S**olutions

The smart locker system for the hybrid workplace

The way we work is changing and flexibility is now expected.

With our self-service smart locker system, your people can work how they want, with secure storage when and where they need it. Make your workplace more flexible, employee and resource-friendly.

As the world's workplace becomes increasingly technology-driven – we're more focused than ever on helping as many people as possible access our solution.

One storage solution, all workplace needs covered.

With just the one adaptive storage system, you can help your people feel at home on every floor, empower collaboration, improve internal logistics and make visitors feel welcome.

Goodbye traditional office, hello smart locker technology.

- **EMPLOYEE DAY LOCKER - Work comfortably, anywhere**

Flexible offices are inspiring places to work – and with our Day Locker configuration, your people can feel at home on every floor. With settings for single-day use or fixed usage time windows, you remove all barriers to flexible working and support total freedom of movement.

- **EMPLOYEE PERSONAL LOCKER - A personal, secure space**

With offices moving to hybrid ways of working, shared spaces are on the rise – and personal desks are disappearing. A smart locker is a great way to give employees the personal, secure feel of a fixed desk, while allowing them to move around more freely.

- **TEAM LOCKER - Share and collaborate easily**

With a smart Team Locker configuration, employees, can create a self-service team storage solution. Handing over documents and using shared materials made easy, with little to no dependence on other team members' schedules.

- **PARCEL LOCKER / COLLECTION - A central place for parcels**

More employees are ordering parcels to be delivered to their office. With a smart Parcel Locker configuration, the delivery staff simply place the parcel in a locker, and the recipient is automatically notified. The entire process is streamlined, with security ensured and no more lost or missing post.

- **VISITOR LOCKER - Visitors feel welcome**

It's not just your people who want secure, flexible storage. When guests visit, you can make them feel instantly comfortable, with an assigned locker for their personal items. This allows you to flexibly allocate a certain number of lockers to visitors, so you'll always have plenty available when you need them. It's just as easy to re-allocate them back to employees, too.

- **CHANGING ROOM LOCKER - Encourage health and fitness**

A good balance is key to happy, motivated employees. So, whether your people are coming in straight from the gym, have a lunchtime class, or need to change after work for a session – a smart Changing Locker configuration makes it easy and accessible.

Using smart changing lockers means you can dynamically allocate facilities to different employees, supporting more of your people, while using fewer resources.

- **IT SPARE PARTS LOCKER - Better manage and track equipment**

With teams working remotely, or between home and the office, you can help with remote IT asset distribution and management. With our IT spare part configuration, employees can receive, manage and track IT equipment or inventory across the organization, with end-to-end access tracking.

Unlock the power of Smart Lockers

Don't pay for air

Did you know that 37% of employees don't need a locker?

With our locker technology, locker usage is optimized so all lockers get used. The result: you save between 40- 60% in lockers and space.

Self-serve lockers are hassle-free

Your people can help themselves to more than just coffee.

A smart locker system means your people have access to storage without facility management intervention. So, no more lost keys or wasted time – hello to frictionless freedom of movement.

Better for the finance team and the planet

The most flexible, instantly adaptive and sustainable approach to workplace storage.

By encouraging an optimal use of resources, you'll use less space and energy, keeping everyone happy.

Flex to be future ready with real time data

Adapt to changing workplace needs. Our locker technology is designed to follow the needs of your users, instantly and continuously, without delays or manual interventions.

One smart, easy to use system.

- Guaranteed performance.
- Always on.
- Hosted in the cloud.
- Fully secure.

Cloud-based SaaS, always 'on'

Our multi-tenant SaaS locker system is designed for and by workplace experts and scalable across locations. Built on Microsoft Azure, it's always on. Instant and regular technical and feature updates mean it's always ahead of the game too – so you are prepared for anything, whatever happens.

Seamless integration with your office IT ecosystem

Our smart locker system is the perfect partner for any modern office. It's designed to integrate seamlessly with any IT ecosystem. So, say goodbye to manual syncing of employee data or fragmented workplace technologies, and hello to automatic, up-to-date and fully synchronized functionalities.

We have 337+ API integrations live with leading tech-platforms and third-party technologies: workplace systems, access control and identity management systems.

0-12

Security is crucial when it comes to workplace storage technology – from physical security of items to meeting the most stringent information and data security standards.

Our in-house information security team has 100% pass rate on information security audits, which include the world's largest banks and government organizations. We take you by the hand and ensure data privacy is none of your worries.

Your data is in safe hands, with our secure-by-design locker technology and ISO27001 certification.

Hassle free user-experience: A smarter system that's easy, seamless and scalable

- Super easy to use - open lockers via app driven experience or swipe card
- Save facilities on management time - Security is top priority.

Smart technology for multiple industries & applications

Education

- 90% less facilities management time
- Enhanced, streamlined student experience
- Safe surfaces and easy cleaning

- Remote, automated locker management
- No hassles with keys or batteries

Hospitals

- Dynamic locker solutions for personnel working in shifts
- Contactless, and easy to clean
- Self-service and remote management

Workplaces

- Automated locker management
- Seamless and rich user experience
- Maximized FM productivity and time savings
- Easy to manage, scale, and adapt

Locker Rooms

- 100% Self-service for added flexibility
- Easy to use
- Contactless and easy to clean
- Real Time Data and Analytics

- Highly flexible working environments like warehouses, logistic centres and research facilities need to accommodate employees in rotating shifts, making smart storage indispensable.
