RFID

BASIC / ADVANCED MANAGEMENT

Aspire™

Touch-Free and Designed to Protect

Digilock's Aspire RFID secures your personal

belongings with a balance of distinct form and

function. Whether it's for a new installation or

a retrofit, this touch-free option is the perfect,

simplified security solution.

Digilock®

Touch-Free Security

Aspire's touch-free RFID lock systems secure the workplace with ease. With shared- and assigned-use capability, systemwide compatibility and minimal management, it's your complete storage solution.

For installations that require rapid and ready access, Digilock's Aspire RFID locks offer perfectly secure, contact-free options that fit your needs—no buttons, no keys. Just the swipe of an authenticated credential provides your location and workflow simple, efficient protection.

Engineered for Anywhere

From inspiration to installation, we partner with our customers in many industries to ensure that their facilities offer the latest in personal security solutions, providing convenience and peace of mind.

- Workplace
- Healthcare
- Hospitality
- Retail
- Manufacturing
- Government

Combining quality construction with state-of-the-art security, Aspire is perfect for the most demanding environments. Easily managed and simple to use, our lock solutions modernize any space with improved flexibility and collaboration.

- 2-year warranty

Customize Your Lock System

1 **APPEARANCE**

Choose from Four, Elegant Body Styles in Both Brushed Nickel and Matte Black Finishes.

| Standard | Standard with Pull | Narrow | Narrow with Pull |

The Narrow body style is available in both vertical and horizontal mounting options.

2 FUNCTIONALITY

Choose the Use Case That's Right for You.

SHARED USE

A simple day-use solution, shared-use functionality lets the User select any available storage space and present a valid RFID credential to lock and the same RFID credential to unlock an Aspire unit. When the current user is done and the storage space is vacated, Aspire is ready for the next user and RFID credential.

OR

ASSIGNED USE

If you need to assign storage for a longer period of time, assigned use lets management program single or multiple RFID credentials to the lock for the User or Users. Each user presents the assigned RFID credential to unlock an Aspire unit. To lock, the user simply closes the door to activate the auto-relock feature.

Locking Options for Shared and Assigned Use

DUAL-USE DEADBOLT

Features a 1/2" (12.7mm) motorized deadbolt designed for either shared- or assigned-use functionality.

SHARED USE   ASSIGNED USE

AUTO-RE LOCK DEADLATCH

Features a 1/2" (12.7mm) motorized deadlatch designed for assigned-use functionality.

ASSIGNED USE ONLY

3 MANAGEMENT

Two Management Systems. One Smart, Scalable Solution.

Basic:

Digilock 's original, electronic key system provides reliable and cost-effective security and flexibility.

OR

- A single yellow Programming Key assigns up to 6 Manager Keys per system
- Assign up to 20 different Users per lock
- Provides Management override access
- Provides external power against battery failure
- Elapsed-time auto unlock

Advanced:

Digilock 's advanced management system is built on the same time-tested, security architecture but leverages the processing power of the mobile tablet and application to provide more powerful tools and easier, more detailed system management.

- A single white Data Key assigns up to 250 Manager Keys or cards per system
- User/Manager database simplifies assignment/reassignment of up to 250 Users and 250 Managers per lock
- Audit trail and usage data analy tics reports
- Simple, visual battery-level indicator
- Real-time clock allows scheduled auto unlock
