

AUTO SCRAMBLE MECHANICAL

Designed with simplicity in mind, the KL20 offers mechanical keyless access suitable for a variety of lockers, cabinets and cupboards.

A simple robust mechanical lock. Tough alloy front and handle. Flush mounted ideal for personal storage in offices, schools and colleges. The user selects their own 4 digit code and this remains unchanged until they wish to alter it. The user can change their code at anytime and the KL20 has the added security and convenience of an auto scrambling function. The dials automatically scramble to 0-0-0-0 when the lock is used, thus hiding the user code from others.

FUNCTIONS

A U TO
SCRAMBLE!

Private Function

This function is used where the same code will be repeatedly used, e.g. an employee with the same locker/drawer in the workplace.

Code Retrieval

This function requires the Master Key (sold separately). Allows a code to be retrieved should it be forgotten or emergency access is required.
