r-evolve

storage system

the fast access, high density,
space efficient filing system

r-evolve storage units are one of our most innovative filing concepts, delivering up to 400% more capacity than conventional filing units.

The filing concept is simple in design, yet highly effective. It consists of a double sided rotating unit, allowing the user to access two full sides of filing from one point. A simple foot pedal provides complete and safe control.

The **r-evolve** concept is so effective it can store the contents of eighteen four drawer filing cabinets in just three eight tier units.

versatility

OSS can install the complete system in a range of our standard finishes or to any colour from the RAL or BS range of colours.

- Up to 400% more capacity
- Reduced footprint
- Wide range of fitments
- Foot pedal to provide complete, safe control
- Secure lockable units
- Bespoke finishes

options

A wide range of fitments makes **r-evolve** suitable for storing a vast array file types and multimedia;

- Standard slotted shelves with or without shelf dividers
- Lateral filing frames
- 'Duplex' shelves - the flexibility of shelf filing combined with Lateral hanging filing underneath
- Roll-out hanging folder frames
- Roll-out stationary/computer media drawers
